

A Happy New Year to you all!

Last term was a busy one, with lots going on from the official opening of our school to the Primary 7 Christmas Dance.

RME

In the month of December, Primary 7 investigated the festival of Advent and researched the origins of Christmas Traditions ie, Christmas cards/trees etc.

October - January

Primary 7

Science

In science we have been learning about Living Things in the Environment. Primary seven have been investigating many different environments across the world. We have been learning about ecosystems, biomes and food chains, the reasons why they are important to us and how we can look after them properly. We are recording new words on our word bank tree and will continue to complete our Science Passports in the New Year.

Pr

Health & Wellbeing

In Health & Wellbeing, the children were learning about Substance Misuse. They investigated the effects of smoking, drinking alcohol and drugs. Primary 7 were lucky to borrow resources from NHS Lanarkshire's resource library. This helped the children to understand the consequences and dangers of such risk taking behaviour.

In addition to this, Primary 7 learned how to help others in an emergency situation. They learned how to perform hands on CPR.

Maths

Primary Seven continue to make excellent progress in maths and have embraced many challenges over this term. We have worked hard on division, area and mental maths. As a class we have been learning to use our practical math skills in money to help us with our Enterprise topic, this has included pricing materials, agreeing on a sale price and calculating coin value and change.

Topic

Our Primary Seven topic for this term was Enterprise. The class learned about how ideas can become something special with creativity, hard work and the right attitude. The Christmas Fair provided the opportunity to create a product and the class worked hard as a team to produce beautiful Christmas cards that could be sold with all proceeds invested back into school funds. Leadership roles within the class team were available and job applications were issued. Following interviews the successful applicants were chosen to lead our project in various areas.
